Subject: Support for LPA position

To whom it may concern,

I would like to lend my support to the proposal to limit the requirement for ongoing supervision of the LPA's. I have had the pleasure of working with many very skilled, highly experienced LPA's at North Carolina's Central Prison. These individuals make significant contributions to the clinical care of the patients. I agree with their position that having the requirement for ongoing supervision regardless of the number of years of clinical experience is not a productive use of either their time or their supervisor's time. Enacting this proposal will be a win for the citizens of North Carolina especially our under-served populations.

Sincerely,

Brian Sheitman, M.D.
